# 4 - Bedroom House with split-level entry

How would you like a house large enough to have four bedrooms yet capable of being built on the typical suburban lot? This house fits the bill and more. Designed for a gently sloping lot, this house contains two baths, a laundry, family room, a spacious kitchen, and four bedrooms.

Enter the split-level foyer and you have a choice of going to the upper level, containing the formal living areas, or to the lower level, containing the family and utility areas.

As you ascend the stairs, the living room is visible to the left. Directly ahead lies the kitchen, convenient for

Washington, D.C.

unloading groceries, which can be screened from view by an accordion door.

The dining area lies adjacent to the kitchen and living area. This area can be partitioned from the living area, but it is designed without a partition to give added space to the living area for special entertainment needs.

To the right, at the top of the stairs, is a large coat closet, next to which, is a laundry chute conveniently serving the laundry room. The remainder of the upstairs contains a bathroom, two large bedrooms with spacious closets, and a linen closet.

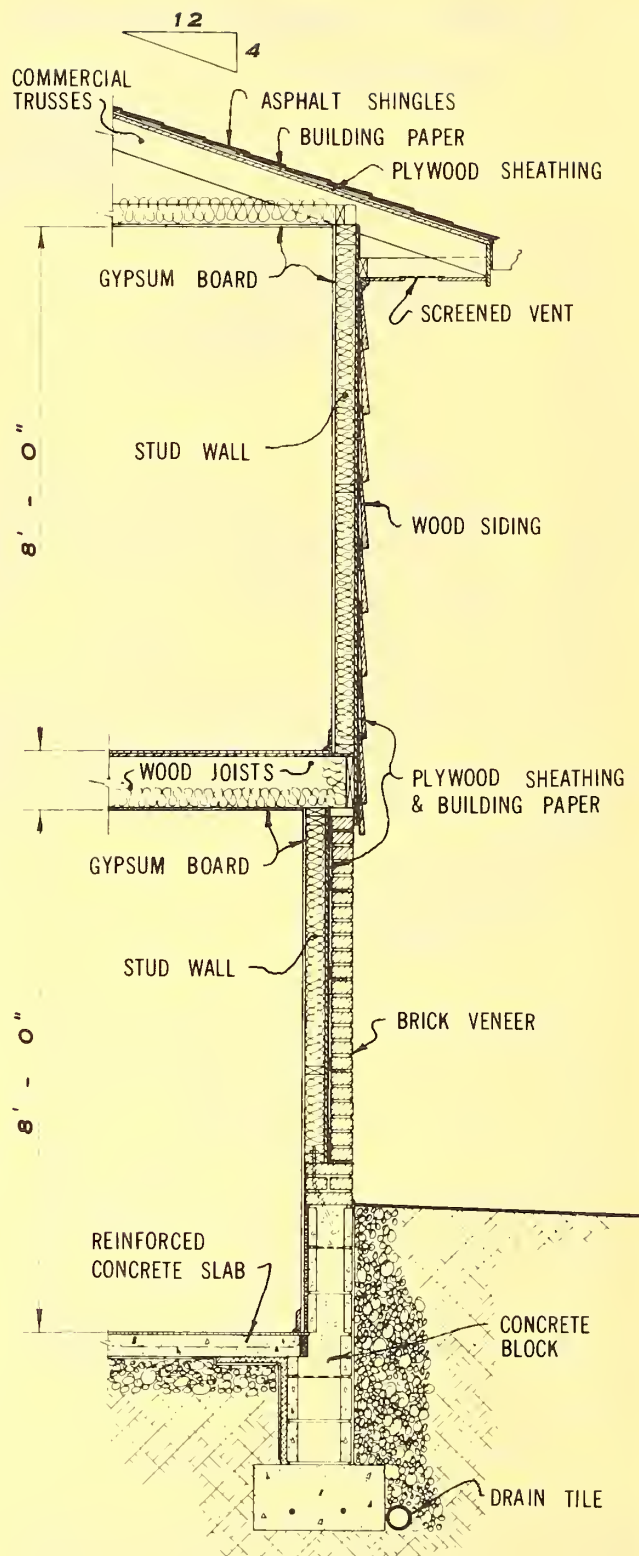

At the lower level, you enter the large family room which is accessible to the backyard. Through the door off the family room, you would enter a bedroom or an optional office.

To the right, down the stairs, is a linen closet, laundry chute, the second bathroom, a bedroom, and a large laundry area containing storage space. Additional storage is located under the stairs.

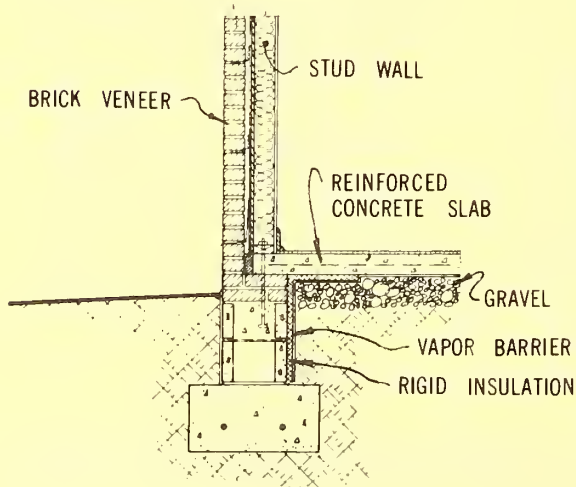

The house is basically stud-wall construction. The upper level is finished with wood siding, and the lower level with brick veneer. The roof is spanned by standard commercial trusses.

Complete working drawings may be obtained from the extension agricultural engineer at your State university. There may be a small charge to cover cost of printing.

If you do not know the location of your State university, send your request to Agricultural Engineer, Extension Service, U.S. Department of Agriculture, Washington, D.C. 20250. He will forward your request to the correct university. ORDER PLAN NO. 7201, FOUR-BEDROOM HOUSE with split-level entry.
